

REACH Compliance Declaration 2026

In June 2007, the European Union Regulation (EC) 1907/2006 concerning the Registration, Evaluation, Authorisation and Restriction of Chemicals (REACH) was first released. This Regulation establishes specific duties and obligations for Companies in the European Union (EU) that manufacture or import substances on their own, in preparations, or in articles.

Under the structure of the REACH Regulation, Cristal Laser is a manufacturer and supplier of “articles” to the EU. We do not manufacture or supply “substances” or “preparations” and our articles do not involve the “intentional release of substances”. Accordingly, we foresee no registration or pre-registration requirement for the products we supply to our customers.

At Cristal Laser, we synthesize mineral crystals with different substances and we buy these substances from European Distributors / Importers. Suppliers are responsible for registrations of substances. According to the definitions in REACH, the role of Cristal Laser Company is “Producer of Articles”. Cristal Laser Company does have an obligation of information on the substances contained in its articles.

Our customers are advised to check out the European CHemical Agency's website for the current list of the 290 Substances of Very High Concern under REACH (last updated Dec. 12th, 2025):

- Cristal Laser does not use any substances from the list of “Substances of Very High Concern for Authorisation” company-wide.
- Cristal Laser products (articles) do not contain Substances of Very High Concern above the threshold value.

Cristal Laser S.A.S.
